

# Higher Degree by Research - Supervision Procedure

## Section 1 - Preamble

(1) Charles Darwin University ('the University', 'CDU') is committed to providing an environment that enables and supports transformative education through higher degrees by research (HDR) and drives world-class research in areas critical to the sustainable and prosperous development of Northern Australia and the wider region.

## Section 2 - Purpose

(2) This set of procedures outlines the appointment, roles, and responsibilities of supervisors and other members of supervisory panels to assist Higher Degrees by Research (HDR) Candidates.

## Section 3 - Scope

(3) This policy applies to all HDR courses, supervisors of HDR candidates, and university staff responsible for supporting HDR courses.

## Section 4 - Procedure

### Role of Supervisors

(4) Every HDR candidate must be assigned a supervision panel consisting of one principal supervisor and at least one associate supervisor. The role of all research supervisors is to:

- a. enhance the quality, efficiency, and impact of the research they are supervising;
- b. support the wellbeing of candidates;
- c. inculcate responsible, ethical, and safe research practices; and
- d. help develop the research, personal, and career skills of candidates.

(5) Principal supervisors must also:

- a. fulfill the administration and management duties that facilitate the enrolment, progress, and completion of HDR candidates;
- b. meet at regular intervals with candidates to uncover any possible impediments to progress as well as measures that could address these impediments;
- c. together with the assistance of candidates and the Faculty or Institute to which the candidate is allocated (the Home Faculty), assemble the supervision panel and arrange replacements if supervisors depart;
- d. coordinate the supervision panel and resolve discrepancies among panel members; and
- e. if unable to supervise over an extended period, such as more than two months, organise an acting Principal Supervisor.

(6) Associate Supervisors can assume a range of roles. They may:

- a. serve as a subject matter expert on a specific topic;
- b. be the main contact of candidates;
- c. operate as an apprentice who is developing their skills in supervision; and
- d. act in the role of principal supervisor when the principal supervisor is unavailable.

(7) Associate Supervisors can act as the Principal Supervisor only after:

- a. they have registered as a Principal Supervisor on the University Register of Supervisors; and
- b. the Home Faculty has informed Research and Innovation of this arrangement.

(8) The university may also develop subclasses of Principal Supervisors or Associate Supervisors in the future, such as Mentoring Supervisors.

## **Eligibility to Register as a Supervisor**

(9) To be eligible to register as a Principal or Associate Supervisor, individuals must fulfil the following criteria:

- a. be a member of the CDU staff, or hold a relevant adjunct appointment, or be otherwise formally contracted and accountable to CDU for supervisory duties;
- b. attained a doctoral degree or equivalent if they are supervising a Masters by Research or PhD candidate;
- c. acquired the expertise to enhance the quality, efficiency, and impact of the research they are supervising;
- d. completed the supervisory training and assessment specified by the Dean of Graduate Studies;
- e. agree to regular ongoing supervisory training and assessment as specified by the Dean of Graduate Studies; and
- f. have published five or more publications or research outputs including Non Traditional Research Objects (NTROs) in the last five years in relevant academic journals or equivalent sources of academic output, relative to opportunity.

(10) These criteria are also designed to confirm that Principal Supervisors have developed the capacity to predict and manage the challenges that HDR candidates may experience.

## **Approval of Supervisors**

(11) To register as a Principal Supervisor or Associate Supervisor, individuals must complete the Register of Supervisors form found at [HDR Forms and Codes](#), including the training and assessment specified in the form. After this form is submitted:

- a. the Home Faculty may recommend to the Dean of Graduate Studies that:
  - i. the individual be registered as Principal or Associate Supervisor as requested;
  - ii. the individual be registered as an Associate Supervisor instead of a Principal Supervisor (only applicable if the initial registration was for a Principal Supervisor); or
  - iii. the request be rejected.
- b. the Dean of Graduate Studies may then approve this recommendation; and
- c. Research and Innovation will enter the relevant information in the University's Register of Supervisors.

(12) Every five years, Research and Innovation will prompt supervisors to renew their registration.

## Training, Development, and Evaluation of Supervisors

(13) Faculties, Institutes, and Research and Innovation offer regular workshops and developmental opportunities to enable supervisors to fulfil their supervisory responsibilities. These activities should provide knowledge and skills in how to:

- a. motivate and support diverse candidates;
- b. conduct exemplary research; and
- c. comply with relevant laws, codes, policies and procedures, including the [Australian Code for the Responsible Conduct of Research, 2018](#) and the [Principles for Respectful Supervisory Relationships](#).

(14) To develop and implement these activities the Research Committee should determine the minimum level of training and development that individuals must complete to be eligible to register as a Principal Supervisor or Associate Supervisor.

(15) This training and development should impart relevant knowledge and skills in how to motivate and support candidates, conduct exemplary research, and comply with university practices.

(16) The Home Faculty or managers of supervisors may impose other minimum or recommended levels of supervisor training and development.

(17) The Home Faculty, managers of supervisors, or Research and Innovation must evaluate the performance of supervisors as well as address inadequate performance and reward excellent performance.

## Responses to Concerns Raised About Supervision

(18) If concerns have been raised about a supervisor, the Dean of Graduate Studies, the Home Faculty may, depending on the level of severity and evidence, recommend that:

- a. the registration of this supervisor be terminated, either permanently or temporarily;
- b. the supervisor complete relevant training and assessment activities to redress these concerns; or
- c. the role of this supervisor be restricted.

(19) These recommendations may be implemented in response to:

- a. breaches of the [Australian Code for the Responsible Conduct of Research, 2018](#) and the [Principles for Respectful Supervisory Relationships](#);
- b. patterns of behaviour that could impair the wellbeing or productivity of HDR candidates;
- c. an investigation that indicated the supervisor had acted inappropriately;
- d. unconfirmed complaints from multiple candidates or colleagues; or
- e. a failure to complete the minimum level of training and assessment activities or comply with the HDR Student and Supervisor Charter.

(20) These recommendations can be implemented only if approved by the Deputy Vice-Chancellor Research and Innovation.

## The Composition of Supervision Panels

(21) Each HDR candidate must have a panel consisting of at least two supervisors.

(22) The HDR Student and Supervisor Charter stipulates the precise role of supervisors. Before confirmation of candidature can be approved, the Principal Supervisor must confirm that each candidate is assigned at least one

registered supervisor who:

- a. has expertise in the relevant discipline or field of research;
- b. has expertise in relevant methodology or methods;
- c. is likely to be employed at CDU during the entire candidature; and
- d. has published five or more publications in the last five years in relevant, high-ranking academic journals or equivalent sources of academic output.

(23) Ideally, at least one person on the supervision panel should be an early-career researcher who could benefit from their role in this project.

(24) No academic may be the principal supervisor of more than eight (8) candidates at once. The Home Faculty should confirm that supervisors can allocate sufficient time to each HDR candidate based on the supervisor's current and future employment, workload and supervisory load.

(25) To protect the right of candidates to express concerns and to maintain autonomy supervisors must prevent or report actual, potential, or perceived conflicts of interest that could be detrimental to the candidate, to the research project, or to the university, in line with the [Conflicts of Interest Policy](#) and [Conflicts of Interest Procedure](#).

(26) If two staff who are close relatives or involved in a romantic relationship want to supervise the same candidate, they need to submit a justification to the Deputy Vice-Chancellor Research and Innovation. This justification should outline the necessity of this supervisory arrangement as well as how these staff plan to manage the risks, such as the imbalance of power and the possibility that both supervisors might leave the university before the thesis is completed. This relationship must also be declared on the [Conflict of Interest eform](#) in line with the [Conflicts of Interest Policy](#) and [Conflicts of Interest Procedure](#).

## Changes to the Supervisory Panel

(27) HDR candidates, in consultation with their supervisors or other individuals, may decide to change the membership of their supervision panel. To arrange permanent changes candidates should complete the Change of Supervisors Panel form found at [HDR Forms and Codes](#) and seek the approval of all members of the updated supervision panel.

(28) If the Home Faculty endorses these requests, the Dean of Graduate Studies must approve these requests or suggest other arrangements.

(29) HDR candidates may sometimes wish to remove a supervisor from the supervision panel but do not feel able to communicate this information to the supervisor. In these circumstances, the candidate should convey this decision to their Principal Supervisor, to the HDR coordinator, or to the Dean of Graduate Studies. These individuals can then inform the relevant supervisor as sensitively as possible.

(30) If Principal Supervisors cannot fulfill their role for more than two months, they should arrange an interim Principal Supervisor and inform their Home Faculty as well as Research and Innovation.

## Section 5 - Non-Compliance

(31) Non-compliance with Governance Documents is considered a breach of the [Code of Conduct – Staff](#) or the [Code of Conduct – Students](#), as applicable, and is treated seriously by the University. Reports of concerns about non-compliance will be managed in accordance with the applicable disciplinary procedures outlined in the [Charles Darwin University and Union Enterprise Agreement 2022](#) and the [Code of Conduct – Students](#).

(32) Complaints may be raised in accordance with the [Code of Conduct – Staff](#) and [Code of Conduct - Students](#).

(33) All staff members have an individual responsibility to raise any suspicion, allegation or report of fraud or corruption in accordance with the [Fraud and Corruption Control Policy](#) and [Whistleblower Reporting \(Improper Conduct\) Procedure](#).

## Status and Details

<b>Status</b>	Historic
<b>Effective Date</b>	14th September 2023
<b>Review Date</b>	14th September 2026
<b>Approval Authority</b>	Academic Board
<b>Approval Date</b>	14th September 2023
<b>Expiry Date</b>	6th November 2023
<b>Responsible Executive</b>	Steve Rogers Deputy Vice-Chancellor Research and Innovation +61 8 89466890
<b>Implementation Officer</b>	Steven Greenland Dean of Graduate Studies
<b>Enquiries Contact</b>	Steven Greenland Dean of Graduate Studies

## Glossary Terms and Definitions

**"Home Faculty"** - The Faculty in which a Higher Degree by Research candidate is enrolled

**"Faculty"** - An organisational and academic unit in the University that delivers courses and conducts research.
